

## **We at Leichtwerk**

are developing technologically sophisticated products in the field of structural lightweight construction for aircraft, wind turbines, high-speed trains, automobiles and research facilities. In doing so, we transfer science-based technical procedures into simple and efficient practical applications.

For our quickly growing team of around 50 aviation enthusiasts located at the “Forschungsflughafen Braunschweig” we are constantly looking for new, highly committed colleagues who can support us in exciting and technologically demanding client projects. Currently, we are looking for a

# **Technical Teamleader (m/f) for fuel cell systems**

## **Your tasks will be to**

- work with technical project leader/lead engineer, customers and suppliers to develop system requirements for a fuel cell system and to support and coordinate the specification of requirements down to component level
- plan and manage a development in terms of technology, organization, time and budget in accordance with common aviation standards (e.g., ARP4754a or ARP4761)
- responsible to perform or commission and manage the development of the specified systems
- integrate and test the developed fuel cell system into an overall propulsion system
- eventually integrate and test the successfully tested overall propulsion system into the aircraft

## **You should have**

- a master degree or diploma in aerospace or electrical or mechanical engineering or similar. (e.g., energy and process engineering, alternative propulsion concepts)
- at least 3-5 years of professional experience in fuel cell system development for mobile application
- desirably 3-5 years of professional experience in the field of requirements engineering and developments for civil aviation aircraft along defined EASA standards
- desirably first experience in the design, simulation, integration and testing of fuel cell systems
- a structured working approach and be able to cope with complex processes
- a high level of self-motivation, act proactively and quickly acquire new content
- good language skills in German or English

## **We are offering**

- a demanding working environment with direct access to a network of leading research institutes in Germany and Europe that offers many opportunities for professional and personal growth
- an open and friendly working atmosphere with good work-life balance
- a competitive salary with high flexibility (40 hours / week, 30 days paid holidays)

## **Interested?**

Then please submit your application to [personal@leichtwerk.de](mailto:personal@leichtwerk.de) or inquire again by phone at **+49-531-245405-0**. We look forward to receiving your application!
